Gujarat Technological University

PROFILE

I'm a Front-End Developer passionate about creating attractive and user-friendly websites and applications. I pay great attention to detail and excel in using HTML/CSS and JavaScript to craft engaging digital experiences. I'm also proficient in React and WordPress, having completed over five impressive front-end projects. As a developer, I'm committed to continuously expanding my skillset, constantly pushing my limits, and using every learning opportunity to achieve greater success in my journey.

WORK EXPERIENCE

Frontend Developer

The Sharpener Co.   August 2022 - Present

- Effectively developed and put into action visually attractive and extremely functional websites for a wide variety of clients, surpassing their expectations and eliciting positive feedback.

- Utilized frontend technologies such as HTML, CSS, JavaScript, and WordPress to design responsive and cross-browser-compatible websites. These websites demonstrated outstanding performance in terms of speed and user engagement.

- Successfully engaged with Restful APIs and data formats like JSON and XML that allowed for dynamic content integration and data-driven features that enhanced website functionality and improved user experiences.

Frontend Developer Intern

White Code Labs   May 2020 - July 2022

- Developed and deployed dynamic websites using React JS, enhancing the user experience and delivering responsive and highly interactive web applications.

- Implemented a secure user authentication system by integrating the frontend with both the backend infrastructure and Firebase, ensuring seamless user access control and data protection for the application.

Personal Ventures

Task AI

Task AI: Your smart task manager. Create to-dos and get automatic step-by-step guidance for seamless task completion. Built with React, Tailwind and OpenAI.

Ai Image Generator

Developed a MERN AI image generator with cloud integration for easy image creation, upload, and download, featuring Tailwind CSS.

Ecommerce Website

Created a responsive e-commerce website with ReactJS, Redux, and Material UI, featuring cart functionality.

Crypto Tracker

Developed a crypto tracker app using Coinranking API, React, Redux Query, and MUI
